ERRATUM

By the Associate Chief, International Bureau: Released: August 10, 2000

This Erratum corrects the *Report and Order* in the above captioned proceeding, FCC 00-212, which was released on June 22, 2000. This correction has been made prior to the printing of the FCC Record and thus the Record will be published correctly.

Several erroneous references to section 101.57, which no longer exists, appeared in the above captioned *Report and Order*. We correct this by deleting those references and adding the following section, immediately after section 101.81 to read as follows:

§ 101.83 Modification of station license.

Permissible changes in equipment operating in the band 18.58-19.3 GHz:
Notwithstanding other provisions of this section, stations that remain co-primary under the provisions of § 101.147(r) may not make modifications to their systems that increase interference to satellite earth stations, or result in a facility that would be more costly to relocate.

FEDERAL COMMUNICATIONS COMMISSION

Robin R. Layton, Associate Chief
International Bureau
